PROFESSIONAL SUMMARY

AI Engineer with 2.8 years of enterprise IT experience as an App Development Analyst at Accenture, specializing in the SAP MM domain. Worked on procurement and inventory management processes, business requirement analysis, production support, defect resolution, stakeholder collaboration, testing, and process optimization for enterprise clients. Transitioned into Artificial Intelligence through structured training and hands-on project development. Currently working as a Gen AI Development Intern at Hope Artificial Intelligence Pvt. Ltd., developing AI applications using Python, Machine Learning, Generative AI, Agentic AI, LangChain, LangGraph, FastAPI, and LLM technologies. Passionate about building intelligent, scalable AI solutions that solve real-world business problems.

SKILLS

Programming & Databases:
Python, SQL, MySQL

Deep Learning & NLP:
TensorFlow, PyTorch, Keras, NLP, LSTM, CNN, Generative AI, Prompt Engineering, RAG

LLM & AI Frameworks:
LangChain, LangGraph, OpenAI API, Gemini API, AutoGen

MLOps & Deployment:
Docker, Kubernetes, CI/CD Pipelines, Model Deployment, Model Monitoring.

Tools:
Git, GitHub, Jupyter Notebook, Tableau, MLflow

Machine Learning & Data Science:
NumPy, Pandas, Scikit-learn, Feature Engineering, Data Preprocessing,Hyperparameter Tuning, Model Evaluation, SMOTE, Predictive Analytics

Computer Vision:
YOLOv8, OpenCV, Object Detection, Image Classification

Web & API Development:
Flask, Django, FastAPI

Cloud Platforms:
AWS (S3, EC2, SageMaker, Lambda), Google Cloud Platform

PROJECTS

AI Powered SAP MM Ticket Resolution Assistant
- Developed a multi-agent SAP MM AI assistant for ticket classification, resolution, escalation, and summarization.
- Built a RAG pipeline with FAISS to retrieve SAP MM knowledge and generate context-aware solutions.
- Designed a Streamlit dashboard with SQLite for ticket management, analytics, and resolution tracking.
- Automated SAP MM production support workflows to reduce manual effort and improve response consistency.
- **Tech Stack:** Python, LangGraph, LangChain, Groq LLM, FAISS, Streamlit, SQLite, RAG
- Github: https://github.com/DeviSrinivasan1325/AI-Powered-SAP-MM-Ticket-Assisstant

Multi-Agent AI Model Advisor for Businesses
- Built an Agentic AI Model Advisor using LangChain, LangGraph, Groq Llama 3.3 70B, FastAPI, and React.
- Developed a multi-agent workflow for AI model classification, recommendation, and comparison based on business needs.
- Implemented an efficiency scoring and INR-based cost estimation system across 18+ AI models from 7 providers.
- Created a real-time chat interface with model comparison cards and context-aware multi-turn AI recommendations.
- **Tech Stack:** Python, LangChain, LangGraph, Groq Llama 3.3 70B, FastAPI, React, REST APIs
- **GitHub:** https://github.com/DeviSrinivasan1325/Agentic-AI-project

AI-Powered GST Invoice Document Processor
- Built AI system for GST invoice extraction using OCR, Gemini AI, and regex rules.
- Improved accuracy using hybrid pipeline with rule-based overrides.
- Implemented GSTIN auto-correction and duplicate detection (Invoice No. + GSTIN).
- Developed and deployed web app using Flask with Excel report generation.
- **Tech Stack:** Python, OCR, Gemini API, Regex, Flask, Pandas, OpenPyXL, REST APIs.

- **GitHub**: https://github.com/DeviSrinivasan1325/GENAI-project

Child Safety Hazard Detection System
- Built YOLOv8 model to detect child, knife, and scissors in images.
- Calculated object proximity using distance metrics.
- Designed 3-level alert system based on distance and overlap.
- Deployed solution using Flask for real-time image-based detection.
- **Tech Stack:** Python, YOLOv8, OpenCV, Deep Learning, Flask, Computer Vision.
- **GitHub:** https://github.com/DeviSrinivasan1325/Deep-Learning-Project

Credit Card Transaction Fraud Detection
- Built machine learning models for fraud detection on imbalanced transaction datasets.
- Applied SMOTE, feature engineering, and data preprocessing techniques.
- Evaluated Random Forest models and deployed the solution using Django.
- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, Random Forest, SMOTE, Django, Machine Learning.
- **GitHub:** https://github.com/DeviSrinivasan1325/Capstone-Project---ML-DS

PROFESSIONAL EXPERIENCE

Gen AI Development Intern 07/2026 – Present
Hope Artificial Intelligence Pvt. Ltd. Remote
- Assisting in the development of Generative AI applications using Python.
- Working with LLMs, prompt engineering, and AI workflows.
- Collaborating on AI application development and testing.
- Learning and implementing industry best practices in AI engineering.

App Development Analyst (SAP MM Domain) 09/2021 – 05/2024
Accenture Chennai, India
- Supported SAP MM procurement and inventory management processes.
- Analyzed business requirements and configured SAP MM solutions.
- Investigated and resolved production issues.
- Performed testing and defect validation.
- Collaborated with cross-functional teams and business stakeholders.
- Contributed to process improvements.
- Promoted from Application Development Associate to Analyst based on performance and project contributions.

Career Transition & AI Upskilling 06/2024 – 10/2025
- Initially planned to pursue higher studies and took a short career break due to personal and family commitments.
- Completed structured training in Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, and Data Science.
- Built multiple end-to-end AI projects involving Agentic AI, LLM applications, Computer Vision, and Predictive Analytics to transition into AI Engineering roles.

EDUCATION

Vel Tech High Tech Engineering College 06/2017 – 05/2021
B.E ECE - First Class with Distinction Avadi, India

CERTIFICATION

Master Program in Applied AI, Gen AI & Data Science 11/2025 – 05/2026
HOPE AI Coimbatore, India
Certified

AWARDS

Consistent Active Learner 03/2026
Hope AI Institute

Hope AI's Best Project of the Month - April 2026 04/2026
Hope AI Institute
Project title : **AI-Powered GST Invoice Document Processor**
