PROFESSIONAL SUMMARY

SAP MM Consultant with **2.8 years of experience** in SAP S/4HANA Rollout and SAP ECC Support across Procurement and Manufacturing domains. Experienced in end-to-end **Procure-to-Pay (P2P)** processes, Inventory Management, Stock Transport Orders (STO), Release Strategy, Outline Agreements, SAP Fiori, Functional Specifications, Testing, Cutover, and Production Support. Proven ability to analyze business requirements, resolve complex production issues, collaborate with cross-functional teams, and deliver high-quality SAP solutions in enterprise environments.

Following a period of professional upskilling, expanded expertise in **Python, SQL, Generative AI, and Intelligent Automation**, complemented by hands-on experience developing AI-powered solutions for SAP MM ticket resolution and GST invoice processing. Currently working as a **Generative AI Development Intern**, applying AI technologies to automate business workflows and improve operational efficiency. Passionate about combining strong SAP functional expertise with AI-driven innovation to support digital transformation initiatives and deliver measurable business value.

SKILLS

CORE SAP MM EXPERTISE: Procure-to-Pay (P2P) | Purchase Requisition | Purchase Order | Goods Receipt | Invoice Receipt | Inventory Management | Stock Transport Orders (STO) | Release Strategy | Outline Agreements | Source List | SAP S/4HANA | SAP ECC | SAP Fiori | Warehouse Management | LSMW | Functional Specifications | Unit Testing | UAT | Cutover Activities | Production Support | Incident Management | ServiceNow | Cross-functional Integration (MM-FI, MM-SD, MM-PP)

AI & AUTOMATION SKILLS: Python | SQL | Generative AI | Prompt Engineering | LangChain | LangGraph | OpenAI / Gemini APIs | OCR | REST APIs | Pandas | Excel Automation | Git & GitHub

TECHNICAL TOOLS: SAP: SAP S/4HANA, SAP ECC, SAP Fiori, ServiceNow, Solution Manager | **Programming:** Python, SQL | **AI Technologies:** LangChain, LangGraph, Generative AI, Prompt Engineering, OCR | **Tools:** Git, GitHub, Jupyter Notebook, Excel

PROFESSIONAL EXPERIENCE

Generative AI Development Intern 07/2026 – Present
Hope Artificial Intelligence Pvt. Ltd. Remote

- Developing enterprise AI applications using Python and Generative AI technologies.
- Designing intelligent automation workflows using Large Language Models (LLMs), LangChain, and LangGraph.
- Building AI-powered applications focused on enterprise productivity and business process automation.
- Applying Prompt Engineering and Retrieval-Augmented Generation (RAG) techniques for enterprise solutions.

Application Development Analyst – SAP MM Domain 09/2021 – 05/2024
Accenture Chennai

- Worked on SAP S/4HANA Rollout and SAP ECC Support projects for Procurement and Manufacturing clients.

- Supported end-to-end Procure-to-Pay processes including Purchase Requisitions, Purchase Orders, Goods Receipts, Invoice Verification, Inventory Management, STO, and Release Strategies.
- Resolved over 100 production incidents and service requests related to procurement, inventory, master data, and GR/IR issues using ServiceNow.
- Worked extensively with SAP Fiori applications and SAP ECC modules.
- Prepared Functional Specifications and participated in Unit Testing, User Acceptance Testing (UAT), Cutover activities, and Hypercare Support.
- Collaborated with FI, SD, PP, ABAP, BASIS, and business teams to resolve cross-functional issues.
- Promoted from Application Development Associate to Application Development Analyst within two years based on strong delivery performance.

Career Break – Professional Upskilling 06/2024 – 10/2025

- Took a planned career break for personal and family commitments.
- Completed professional training in SAP S/4HANA, Python, Artificial Intelligence, Machine Learning, and Generative AI.
- Built multiple hands-on projects, including SAP MM AI Ticket Resolution Assistant and AI-based GST Invoice Processing solutions.
- Earned industry certifications while preparing for SAP and AI-focused technical roles.

PROJECTS

SAP MM AI Ticket Resolution Assistant

- Developed a multi-agent AI system to automate SAP MM ticket resolution using LangGraph and Retrieval-Augmented Generation (RAG).
- Built AI agents for ticket classification, knowledge retrieval, resolution recommendation, escalation, and ticket summarization.
- Created a searchable knowledge base using historical SAP MM tickets and knowledge articles.
- Improved support efficiency by providing context-aware AI recommendations for SAP MM issues.
- **Technologies:** Python, LangGraph, LangChain, FAISS, Groq LLM, Streamlit
- Github: https://github.com/DeviSrinivasan1325/AI-Powered-SAP-MM-Ticket-Assisstant

AI-Powered GST Invoice Processing System

- Developed an AI-based GST invoice processing solution using OCR and Large Language Models.
- Automated extraction, validation, and structuring of invoice information.
- Implemented GSTIN validation, duplicate invoice detection, and Excel report generation.
- Demonstrated how AI can streamline procurement and finance document processing.
- **Technologies:** Python, OCR, Gemini API, Flask, Pandas, OpenPyXL
- Github: https://github.com/DeviSrinivasan1325/GENAI-project

CERTIFICATES

Tech Expressway Program – SAP MM — Accenture
SAP MM Refresher Course — Udemy
SAP S/4HANA Sourcing & Procurement — Udemy
Master Program in Applied AI, Generative AI & Data Science — Hope AI Institute

EDUCATION

Vel Tech High Tech Dr. Rangarajan Dr. Shakuntala Engineering College 06/2017 – 05/2021
B.E Electronic and communication engineering Chennai, India
CGPA- 8.5 (First class with distinction)
